Datasheet for ABIN1633446 SNRPB Protein (AA 1-240) (His tag)

Overview	
Quantity:	1 mg
Target:	SNRPB
Protein Characteristics:	AA 1-240
Origin:	Cow
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SNRPB protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MTVGKSSKML QHIDYRMRCI LQDGRIFIGT FKAFDKHMNL ILCDCDEFRK IKPKNSKQAE
	REEKRVLGLV LLRGENLVSM TVEGPPPKDT GIARVPLAGA AGGPGIGRAA GRGIPAGVPM
	PQAPAGLAGP VRGVGGPSQQ VMTPQGRGTV AAAAAAATAS IAGAPTQYPP GRAGPPPPMG
	RGAPPPGMMG PPPGMRPPMG PPMGIPPGRG TPMGMPPPGM RPPPPGMRGP PPPGMRPPRP
Specificity:	Bos taurus (Bovine)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	SNRPB

Target Details

Alternative Name:	Small nuclear ribonucleoprotein-associated protein B (SNRPB) (SNRPB Products)
Background:	Recommended name: Small nuclear ribonucleoprotein-associated protein B'.
	Short name= snRNP-B'.
	Short name= snRPB'.
	Alternative name(s): Sm protein B'.
	Short name= Sm-B'.
	Short name= SmB'
UniProt:	Q58DW4
Pathways:	Ribonucleoprotein Complex Subunit Organization

Application Details

for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.Restrictions:For Research Use only	Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
