## Datasheet for ABIN1633670 MCCC1 Protein (AA 39-715) (His tag)

Overview

Quantity:	1 mg
Target:	MCCC1
Protein Characteristics:	AA 39-715
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This MCCC1 protein is labelled with His tag.
Application:	ELISA

## Product Details

Product Details	
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	MCCC1	
Alternative Name:	Methylcrotonoyl-CoA carboxylase subunit alpha, mitochondrial (Mccc1) (MCCC1 Products)	
Background:	Recommended name: Methylcrotonoyl-CoA carboxylase subunit alpha, mitochondrial.	
	Short name= MCCase subunit alpha.	
	EC= 6.4.1.4.	
	Alternative name(s): 3-methylcrotonyl-CoA carboxylase 1 3-methylcrotonyl-CoA carboxylase	
	biotin-containing subunit 3-methylcrotonyl-CoA:carbon dioxide ligase subunit alpha	
UniProt:	Q510C3	

## Application Details

	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol

Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
