Tuba3a Protein (AA 1-450) (His tag)

Overview

Quantity:	1 mg		
Target:	Tuba3a (TUBA3A)		
Protein Characteristics:	AA 1-450		
Origin:	Rat		
Source:	Yeast		
Protein Type:	Recombinant		
Purification tag / Conjugate:	This Tuba3a protein is labelled with His tag.		
Application:	ELISA

Specificity:	Rattus norvegicus (Rat)		
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien		
	cells or by baculovirus infection. Be aware about differences in price and lead time.		

Product Details > 90 % Purity: **Target Details** Tuba3a (TUBA3A) Target: Tubulin alpha-3 chain (Tuba3a) (TUBA3A Products) Alternative Name Background: Recommended name: Tubulin alpha-3 chain. Alternative name(s): Alpha-tubulin 3 UniProt: **Q68FR8 Application Details** The yeast protein expression system is the most economical and efficient eukaryotic system Comment: for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
