

Datasheet for ABIN1635721

ZNF365 Protein (AA 1-408) (His tag)

[Go to Product page](#)

Overview

| | |
|-------------------------------|-----------------------------------------------|
| Quantity: | 1 mg |
| Target: | ZNF365 |
| Protein Characteristics: | AA 1-408 |
| Origin: | Rat |
| Source: | Yeast |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This ZNF365 protein is labelled with His tag. |
| Application: | ELISA |

Product Details

| | |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sequence: | <p>MQQTTFEESR YRWQDSLENV AVCLPFRCPD CGDHTRFRSL SSLRAHLEFS HSYEERTLLT</p> <p>KCSLLPSLKD TDLRSESLP KQGKLLRGHA KVTQKQPSYV NLYSISHGHS KDPKPFEMVA</p> <p>ERPVSIVQTY TAVDIRADSL DAPRSSGLP TQDTKAAFEA HVREKFNRMV EAVDRTIEKR</p> <p>IDKLTKELAQ KTAELLEVRV AFVQLTQKKQ EVQRRERALH KQVDVAVEMI AVLKQRLTES</p> <p>EEELLRKEEE VVTFNHFLEA AAEKEVQGKA RLQDFIENLL QRVELAEKQL EYYQSQQASG</p> <p>FSHDTSEHML TDISSSRKSR CLSRGHQHSV CNHPELKAHF HLKGRSYLKK AKDERAGMQP</p> <p>AKAIHEQAES PREFFRPAKK GEHLGLSRKG NFRPKMAKKK PTAIVNII</p> |
| Specificity: | Rattus norvegicus (Rat) |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time. |
| Purity: | > 90 % |

Target Details

| | |
|-------------------|-------------------------------------------------------------|
| Target: | ZNF365 |
| Alternative Name: | Protein ZNF365 (Znf365) (ZNF365 Products) |
| Background: | Recommended name: Protein ZNF365 |
| UniProt: | Q5PQS2 |

Application Details

| | |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. |
| Restrictions: | For Research Use only |

Handling

| | |
|------------------|-----------------------------------------------------------------------------------------------------|
| Format: | Lyophilized |
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
