Datasheet for ABIN1635804

UBE2N Protein (AA 1-152) (His tag)

Overview Quantity: 1 mg UBE2N Target: Protein Characteristics: AA 1-152 Origin: Orang-Utan Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This UBE2N protein is labelled with His tag. Application: **ELISA Product Details** MAGLPRRIIK ETQRLLAEPV PGIKAEPDES NARYFHVVIA GPQDSPFEGG TFKLELFLPE Sequence: EYPMAAPKVR FMTKIYHPNV DKLGRICLDI LKDKWSPALQ IRTVLLSIQA LLSAPNPDDP

LANDVAEQWK TNEAQAIETA RAWTRLYAMN NI

Specificity: Pongo abelii (Sumatran orangutan)

Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

cells or by baculovirus infection. Be aware about differences in price and lead time.

Purity: > 90 %

Target Details

Target:	UBE2N
Alternative Name:	Ubiquitin-conjugating enzyme E2 N (UBE2N) (UBE2N Products)

Target Details

Background:	Recommended name: Ubiquitin-conjugating enzyme E2 N.		
	EC= 6.3.2.19.		
	Alternative name(s): Ubiquitin carrier protein N Ubiquitin-protein ligase N		
UniProt:	Q5R7J6		
Pathways:	TCR Signaling, Fc-epsilon Receptor Signaling Pathway, Activation of Innate immune Response, Toll-Like Receptors Cascades, Positive Regulation of Response to DNA Damage Stimulus, Ubiquitin Proteasome Pathway		

Application Details

Co	 	 _+.

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
