

## Datasheet for ABIN1635924 DYNC1LI2 Protein (AA 1-492) (His tag)

Overview Quantity: 1 mg DYNC1LI2 Target: Protein Characteristics: AA 1-492 Origin: Orang-Utan Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This DYNC1LI2 protein is labelled with His tag. Application: ELISA **Product Details** MAPVGVEKKL LLGPNGPAVA AAGDLTSEEE EGQSLWSSIL SEVSTRAGSK LPSGKNILVF Sequence:

	NNAASEGVLA SFFNSLLSKK TGSPGSPGAG GVQSTAKKSG QKTVLSNVQE ELDRMTRKPD
	SMVTNSSTEN EA
Specificity:	Pongo abelii (Sumatran orangutan)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

## Product Details

Purity:

> 90 %

## Target Details

Target:	DYNC1LI2
Alternative Name:	Cytoplasmic dynein 1 light intermediate chain 2 (DYNC1LI2) (DYNC1LI2 Products)
Background:	Recommended name: Cytoplasmic dynein 1 light intermediate chain 2.
	Alternative name(s): Dynein light intermediate chain 2, cytosolic
UniProt:	Q5RE09
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the

native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
