Datasheet for ABIN1636046

**TBPL1 Protein (AA 1-186) (His tag)**

## Overview

Quantity:	1 mg
Target:	TBPL1
Protein Characteristics:	AA 1-186
Origin:	Zebrafish (Danio rerio)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This TBPL1 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MEPSNDVALD IIVTNVVSF RTRCHLNLRT IGLEGTNVIY KPEVGKVLMM LRPKRITASI WSSGKIICGT ATSEEEAKLG ARRLARCLQK MGFKVRFSDG KVVNVLAVCS MPFQIRLIEF TKNNRPIASY EPELHPAASY RIKNLRSTVQ VFSTGNITVT GPNVQSVASA VEEIYPLLFE CRKTLG
Specificity:	Danio rerio (Zebrafish) (Brachydanio rerio)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	TBPL1
Alternative Name:	TATA box-binding protein-like protein 1 (tbpl1) ( <a href="#">TBPL1 Products</a> )

## Target Details

Background:	Recommended name: TATA box-binding protein-like protein 1. Short name= TBP-like protein 1. Alternative name(s): TATA box-binding protein-related factor 2. Short name= TBP-related factor 2 TBP-like factor

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:	For Research Use only
---------------	-----------------------

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
