

Datasheet for ABIN1636772 NIFK Protein (AA 1-269) (His tag)

Overview Quantity: 1 mg NIFK (MKI67IP) Target: Protein Characteristics: AA 1-269 Zebrafish (Danio rerio) Origin: Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This NIFK protein is labelled with His tag. Application: ELISA Product Details Sequence: MTEGKSSDKP AKRLLALNPK EDAEFQKKVQ QVKKRPQTGQ TLSPGVLYVG HLPRGLFEPQ LKSYFEQFGK VLRLRVSRSK KTGGSKGYGF VEFECDEVAK IVAETMNNYL MGERIIKCHV IPPEKVHEKL FVGSIAGFKK PKYPAVTRYN KTHTEDDVKK VGTKLLSKES KLRKRLAAKG IDYDFPGFAA QIPAKKAPSE ANVSVCSEDV TPVCTPSLLE RRKSLRVEDD DVDDEIVIKV KPLPENSDDV EESEEESAEE DEGEEEEAA Specificity: Danio rerio (Zebrafish) (Brachydanio rerio) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

cells or by baculovirus infection. Be aware about differences in price and lead time.

Target Details	
Target:	NIFK (MKI67IP)
Abstract:	MKI67IP Products
Background:	Recommended name: MKI67 FHA domain-interacting nucleolar phosphoprotein. Alternative name(s): Nucleolar phosphoprotein NOPP34-like protein
UniProt:	Q8JIY8
Application Details	
Commont:	The vesset protein expression system is the meet economical and efficient eukervetic system

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
