

Datasheet for ABIN1636850 LDHD Protein (AA 1-330) (His tag)

Overview Quantity: 1 mg Target: LDHD Protein Characteristics: AA 1-330 Origin: Staphylococcus epidermidis Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This LDHD protein is labelled with His tag. Application: ELISA Product Details Sequence: MTKIMFFGTR AYEKDMALRW GKKNNIDVTT STELLSVDTV DQLKDYDGVT TMQFGKLEPE VYPKLESYGI KQIAQRTAGF DMYDLELAKK HEIIISNIPS YSPETIAEYS VSIALQLVRK FPTIEKRVQA HNFTWASPIM SRPVKNMTVA IIGTGRIGAA TGKIYAGFGA RVVGYDAYPN HSLSFLEYKE TVEDAIKDAD IISLHVPANK DSFHLFDNNM FKNVKKGAVL VNAARGAVIN TPDLIEAVNN GTLSGAAIDT YENEANYFTF DCSNQTIDDP ILLDLIRNEN ILVTPHIAFF SDEAVQNLVE **GGLNAALSVI NTGTCDTRLN** Specificity: Staphylococcus epidermidis (strain ATCC 12228) Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien Characteristics: cells or by baculovirus infection. Be aware about differences in price and lead time.

Purity:

> 90 %

Target Details

Target:	LDHD
Alternative Name:	D-lactate dehydrogenase (IdhD) (LDHD Products)
Background:	Recommended name: D-lactate dehydrogenase.
	Short name= D-LDH.
	EC= 1.1.1.28.
	Alternative name(s): D-specific D-2-hydroxyacid dehydrogenase
UniProt:	Q8CN22
Pathways:	Ribonucleoside Biosynthetic Process
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is

of very high-quality and close to the natural protein. But the low expression level, the high cost
of medium and the culture conditions restrict the promotion of mammalian cell expression
systems. The yeast protein expression system serve as a eukaryotic system integrate the
advantages of the mammalian cell expression system. A protein expressed by yeast system
could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
native protein conformation. It can be used to produce protein material with high added value
that is very close to the natural protein. Our proteins produced by yeast expression system has
been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
