

Datasheet for ABIN1637300 **RFFL Protein (AA 1-362) (His tag)**

Overview

Quantity:	1 mg
Target:	RFFL
Protein Characteristics:	AA 1-362
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This RFFL protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MWASCCNWFC LDGQPEETPP PQGARTQAYS NPGYSSFPSP TGSEPSCKAC GVHFASTTRK

Target Details

Target:	RFFL
Alternative Name:	E3 ubiquitin-protein ligase rififylin (Rffl) (RFFL Products)
Background:	Recommended name: E3 ubiquitin-protein ligase rififylin. EC= 6.3.2 Alternative name(s): FYVE-RING finger protein Sakura RING finger and FYVE-like domain-containing protein 1
UniProt:	Q8CIN9

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
