

Datasheet for ABIN1637970 **HMGA1 Protein (AA 2-107) (His tag)**

Alternative Name:

Go to Product page

Overview	
Quantity:	1 mg
Target:	HMGA1
Protein Characteristics:	AA 2-107
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This HMGA1 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	SESVSKSSQ PLASKQEKDG TEKRGRGRPR KQPSVSPGTA LVGSQKEPSE VPTPKRPRGR
	PKGSKNKGTA KTRKVTTTPG RKPRGRPKKL EKEEEEGISQ ESSEEEQ
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	HMGA1

High mobility group protein HMG-I/HMG-Y (Hmga1) (HMGA1 Products)

Target Details

Background:	Recommended name: High mobility group protein HMG-I/HMG-Y.
	Short name= HMG-I(Y).
	Alternative name(s): High mobility group AT-hook protein 1.
	Short name= High mobility group protein A1
UniProt:	Q8K585
Pathways:	Nuclear Hormone Receptor Binding, Autophagy

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

_	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
