

## Datasheet for ABIN1638372 COMT1 Protein (AA 1-363) (His tag)

Overview Quantity: 1 mg Target: COMT1 Protein Characteristics: AA 1-363 Origin: Catharanthus roseus Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This COMT1 protein is labelled with His tag. Application: ELISA Product Details Sequence: MGSANPDNKN SMTKEEEEAC LSAMRLASAS VLPMVLKSAI ELDLLELIKK SGPGAYVSPS ELAAQLPTQN PDAPVMLDRI LRLLASYSVL NCTLKDLPDG GIERLYSLAP VCKFLTKNED GVSMAALLLM NQDKVLMESW YHLKDAVLEG GIPFNKAYGM TAFEYHGKDP RFNKVFNQGM SNHSTIIMKK ILEIYQGFQG LKTVVDVGGG TGATLNMIVS KYPSIKGINF DLPHVIEDAP SYPGVDHVGG DMFVSVPKGD AIFMKWICHD WSDAHCLKFL KNCHEALPEN GKVILAECLL PEAPDSTLST ONTVHVDVIM LAHNPGGKER TEKEFEALAK GAGFRGFIKV CCAYNSWIME LLK Specificity: Catharanthus roseus (Madagascar periwinkle) (Vinca rosea) Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien Characteristics: cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 %

## Target Details

| Target:             | COMT1   |
|---------------------|---|
| Abstract:           | COMT1 Products  |
| Background:         | Recommended name: Caffeic acid 3-0-methyltransferase.   |
|                     | Short name= CAOMT.  |
|                     | Short name= COMT.   |
|                     | EC= 2.1.1.68.   |
|                     | Alternative name(s): S-adenosysl-L-methionine:caffeic acid 3-O-methyltransferase                    |
| UniProt:            | Q8W013  |
| Application Details |   |
| Comment:            | The yeast protein expression system is the most economical and efficient eukaryotic system          |
|                     | for secretion and intracellular expression. A protein expressed by the mammalian cell system is     |
|                     | of very high-quality and close to the natural protein. But the low expression level, the high cost  |
|                     | of medium and the culture conditions restrict the promotion of mammalian cell expression            |
|                     | systems. The yeast protein expression system serve as a eukaryotic system integrate the             |
|                     | advantages of the mammalian cell expression system. A protein expressed by yeast system             |
|                     | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the      |
|                     | native protein conformation. It can be used to produce protein material with high added value       |
|                     | that is very close to the natural protein. Our proteins produced by yeast expression system has     |
|                     | been used as raw materials for downstream preparation of monoclonal antibodies.                     |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Lyophilized   |
| Concentration:      | 0.2-2 mg/mL   |
| Buffer:             | Tris-based buffer, 50 % glycerol  |
| Handling Advice:    | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage:            | -20 °C  |
| Storage Comment:    | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                                |
|                     |   |
