\circ	1 410 44

Quantity:	1 mg
Target:	KHDRBS1
Protein Characteristics:	AA 1-443
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This KHDRBS1 protein is labelled with His tag.
Application:	ELISA

Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** Target: KHDRBS1 Alternative Name KH domain-containing, RNA-binding, signal transduction-associated protein 1 (Khdrbs1) (**KHDRBS1 Products**) Background: Recommended name: KH domain-containing, RNA-binding, signal transduction-associated protein 1. Alternative name(s): GAP-associated tyrosine phosphoprotein p62 Src-associated in mitosis 68 kDa protein. Short name= Sam68 p21 Ras GTPase-activating protein-associated p62 p68 UniProt: Q91V33 Pathways: NF-kappaB Signaling, Neurotrophin Signaling Pathway, Autophagy **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol

Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

Handling Advice:

Handling

	one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
