Datasheet for ABIN1639546
CLPP4 Protein (AA 61-292) (His tag)

Overview

Quantity:	1 mg
Target:	CLPP4
Protein Characteristics:	AA 61-292
Origin:	Arabidopsis thaliana
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CLPP4 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	ASIEMSQTQE SAIRGAESDV MGLLLRERIV FLGSSIDDFV ADAIMSQLLL LDAKDPKKDI KLFINSPGGS LSATMAIYDV VQLVRADVST IALGIAASTA SIILGAGTKG KRFAMPNTRI MIHQPLGGAS GQAI DVEIQA KEVMHNKNNV TSIAGCTSR SFEQVLKDID RDRYMSPIEA VEYGLIDGVI DGDSIIPLEP VPDRVKPRVN YEEISKDPMK FLTPEIPDDE IY
Specificity:	Arabidopsis thaliana (Mouse-ear cress)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	CLPP4
---------	-------

Target Details

Alternative Name:	ATP-dependent Clp protease proteolytic subunit 4, chloroplastic (CLPP4) (CLPP4 Products)
Background:	Recommended name: ATP-dependent Clp protease proteolytic subunit 4, chloroplastic. EC= 3.4.21.92. Alternative name(s): Endopeptidase ClpP4. Short name= nClpP4 nClpP3
UniProt:	Q94B60

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
