Datasheet for ABIN1639772

KLRF1 Protein (AA 60-231) (His tag)

Overview

Quantity:	1 mg
Target:	KLRF1
Protein Characteristics:	AA 60-231
Origin:	Cynomolgus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This KLRF1 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	L LVSQGVLLKC QKGSHSNTTE HEDIGDLKMN NGTRRNTSNK DLCVSRADQ TVLCQSEWLK YRGKCYWFSN EMKSWSDSYV YCLERKSHLL IIQDELEMAF IQKNLRQSNY VWMGLNFTSL KMTWTWVDGS PLDPKIFFIK GPAKENSCAA IKESKIYSET CSSVFKWICQ Y
Specificity:	Macaca fascicularis (Crab-eating macaque) (Cynomolgus monkey)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	KLRF1
Alternative Name:	Killer cell lectin-like receptor subfamily F member 1 (KLRF1) (KLRF1 Products)

Target Details

Background:	Recommended name: Killer cell lectin-like receptor subfamily F member 1. Short name= Lectin-like receptor F1. Alternative name(s): Activating coreceptor NKp80
-------------	--

UniProt:	Q8MI05
----------	------------------------

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
