

Datasheet for ABIN1640349

Prolactin Family8, Subfamily A, Member 9 (PRL8A9) (AA 31-241) protein (His tag)

[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	Prolactin Family8, Subfamily A, Member 9 (PRL8A9)
Protein Characteristics:	AA 31-241
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Sequence:	IPACLAEEGG CWNPIVETFN SAMQRGETLR NLADQLYTEL YHNQFSSEQF LALNSKLIRR DKTAVRAGTY CHSTLSNSPD GETKHADVET EKYLKMLINF VGAWISPLYH LVIELSAMQD VPETILSKAK DIEENKRELL DDLKWILTKV YPTAEMKEEF PSWEHLSFLK SSNKDSKFLA MFNLSKCIYN ETTYILFYLR TLKCHITGKD C
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Prolactin Family8, Subfamily A, Member 9 (PRL8A9)
---------	---

Target Details

Alternative Name:	Prolactin-8A9 (Prl8a9) (PRL8A9 Products)
Background:	Recommended name: Prolactin-8A9. Alternative name(s): Placental prolactin-like protein C2. Short name= PLP-C2. Short name= PRL-like protein C2 Prolactin-like protein C-beta. Short name= PLP C-beta
UniProt:	Q920I0

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
