Quantity:	1 mg
Target:	ATP5F1D
Protein Characteristics:	AA 23-80
Origin:	Pig
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This ATP5F1D protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	XEAAAAPX SAAGPGXMSF TFASPTQVFF NGANVRQVDV PTQTGAFGIL ASHVPTLQVL	
Specificity:	Sus scrofa (Pig)	
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.	
Purity:	> 90 %	
Target Details		
Target:	ATP5F1D	
Alternative Name:	ATP synthase subunit delta, mitochondrial (ATP5D) (ATP5F1D Products)	
Background:	round: Recommended name: ATP synthase subunit delta, mitochondrial.

Target Details	
	Alternative name(s): F-ATPase delta subunit
UniProt:	Q95312
Pathways:	Proton Transport, Ribonucleoside Biosynthetic Process

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	prage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
