Datasheet for ABIN1642768 Deoxyhypusine Synthase Protein (DYS) (AA 1-297) (His tag)

Overview

Quantity:	1 mg
Target:	Deoxyhypusine Synthase (DYS)
Protein Characteristics:	AA 1-297
Origin:	Methanopyrus kandleri
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Deoxyhypusine Synthase protein is labelled with His tag.
Application:	ELISA
Product Details

Target Details

Target:	Deoxyhypusine Synthase (DYS)
Alternative Name:	Probable Deoxyhypusine Synthase (Dys) (DYS Products)
Background:	Recommended name: Probable deoxyhypusine synthase. Short name= DHS. EC= 2.5.1.46
UniProt:	Q8TXD7

Application Details

etion and intracellular expression. A protein expressed by the mammalian cell system is
igh-quality and close to the natural protein. But the low expression level, the high cost
im and the culture conditions restrict the promotion of mammalian cell expression
. The yeast protein expression system serve as a eukaryotic system integrate the
ges of the mammalian cell expression system. A protein expressed by yeast system
modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
rotein conformation. It can be used to produce protein material with high added value
ery close to the natural protein. Our proteins produced by yeast expression system has
ed as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
