

## Datasheet for ABIN1643164 DIMT1 Protein (AA 1-313) (His tag)

| Overview                      |   |
|-------------------------------|---|
| Quantity:                     | 1 mg  |
| Target:                       | DIMT1   |
| Protein Characteristics:      | AA 1-313  |
| Origin:                       | Cynomolgus  |
| Source:                       | Yeast   |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This DIMT1 protein is labelled with His tag.  |
| Application:                  | ELISA   |
| Product Details               |   |

## Target Details

| Target:           | DIMT1  |
|-------------------|--|
| Alternative Name: | Probable dimethyladenosine transferase (DIMT1) (DIMT1 Products)                          |
| Background:       | Recommended name: Probable dimethyladenosine transferase.                                |
|                   | EC= 2.1.1.183.   |
|                   | Alternative name(s): DIM1 dimethyladenosine transferase 1 homolog DIM1 dimethyladenosine |
|                   | transferase 1-like Probable 18S rRNA (adenine(1779)-N(6)/adenine(1780)-N(6))-            |
|                   | dimethyltransferase Probable 18S rRNA dimethylase Probable S-adenosylmethionine-6-N',N'- |
|                   | adenosyl(rRNA) dimethyltransferase   |
| UniProt:          | Q95KJ0   |

| Comment:         | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|------------------|--|
|                  | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|                  | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|                  | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|                  | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|                  | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|                  | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|                  | native protein conformation. It can be used to produce protein material with high added value      |
|                  | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|                  | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
| Restrictions:    | For Research Use only  |
| Handling         |  |
| Format:          | Lyophilized  |
| Concentration:   | 0.2-2 mg/mL  |
| Buffer:          | Tris-based buffer, 50 % glycerol   |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to         |
|                  | one week   |
|                  |  |

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
