COPS2 Protein (AA 1-439) (His tag)

Overview

Quantity:	1 mg
Target:	COPS2
Protein Characteristics:	AA 1-439
Origin:	Arabidopsis thaliana
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This COPS2 protein is labelled with His tag.
Application:	ELISA

Sequence:	MASDADMEDY GFEYSDEEQE EQDVDIENQY YNSKGMVETE PEEALSGFAE VVQMEPEKAD
	WGFKALKQTV KIYYRLGKYK EMMEAYTEML TYIKSAVTRN YSEKCINNIM DFVSGSASQN

	DPEILAMTNL IAAYQRNEII EFERILKSNR RTIMDDPFIR NYMEDLLKKV RTQVLLKLIK PYTKIGIPF
	SKELNVPETD VTELLVSLIL DSRIDGHIDE MNRYLLRGDS GNGRKLHKAV DKWNSQLKSL
	SSNITSRVC
Specificity:	Arabidopsis thaliana (Mouse-ear cress)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalie
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** Target: COPS2 COP9 signalosome complex subunit 2 (CSN2) (COPS2 Products) Alternative Name Background: Recommended name: COP9 signalosome complex subunit 2. Short name= Signalosome subunit 2. Alternative name(s): Protein FUSCA 12 UniProt: Q8W207 Pathways: Cell Division Cycle **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

one week

-20 °C

Storage:

Storage Comment:

Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
