

Datasheet for ABIN1643822 CGB2 Protein (AA 25-139) (His tag)

Overview Quantity: 1 mg CGB2 Target: Protein Characteristics: AA 25-139 Origin: Striped bass (Morone saxatilis) Yeast Source: Protein Type: Recombinant Purification tag / Conjugate: This CGB2 protein is labelled with His tag. Application: ELISA **Product Details** Sequence: FQLPPC QLINQTVSLE KEGCPKCHPV ETTICSGHCI TKDPVIKIPF SNVYQHVCTY RDLHYKTFEL PDCPPGVDPT VTYPVAQSCH CGRCAMDTSD CTFESLQPNF CMNDIPFYY Specificity: Morone saxatilis (Striped bass) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** CGB2 Target: Alternative Name: Gonadotropin subunit beta-2 (cgbb) (CGB2 Products)

Target Details	
Background:	Recommended name: Gonadotropin subunit beta-2. Alternative name(s): GTH-II-beta Gonadotropin beta-II chain
UniProt:	Q91121
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions: Handling	For Research Use only
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
