Datasheet for ABIN1644215
EMG1 Protein (AA 1-229) (His tag)

Overview

Quantity:	1 mg
Target:	EMG1
Protein Characteristics:	AA 1-229
Origin:	Candida sp.
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This EMG1 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MVEDSKARIG GPNNSSVTCK QEPRLYVVL C EASLETYTSN DHRTSLLNCD DHQGILRKMG RDIAEARPDI THQCLLTL LD SPINKAGLLQ VYILTKKNVL IEVNPSVRIP RTFKRFSGLM VQLLHKLSIR SMESNTHLL RVVKNPVTKY LPADCRKVTL SFDAEVMRPQ EYLGDKQSVC VFGAMARGH DSFADEYVDD KIAISNYPLS ASVACSKFCH GAEDAWAII
Specificity:	Candida glabrata (strain ATCC 2001 / CBS 138 / JCM 3761 / NBRC 0622 / NRRL Y-65) (Yeast) (Torulopsis glabrata)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	EMG1
Alternative Name:	Ribosomal RNA small subunit methyltransferase NEP1 (NEP1) (EMG1 Products)
Background:	Recommended name: Ribosomal RNA small subunit methyltransferase NEP1. EC= 2.1.1.-. Alternative name(s): 18S rRNA (pseudouridine-N1-)-methyltransferase NEP1 Essential for mitotic growth 1 Nucleolar essential protein 1
UniProt:	Q96UP2

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
