NR5A1 Protein (AA 1-461) (His tag)

Overview

Quantity:	1 mg
Target:	NR5A1
Protein Characteristics:	AA 1-461
Origin:	Horse
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This NR5A1 protein is labelled with His tag.
Application:	ELISA

Product Details	
Sequence:	MDYSYDEDLD ELCPVCGDKV SGYHYGLLTC ESCKGFFKRT VQNNKHYTCT ESQSCKIDKT
	LRKRCPFCRF QKCLTVGMRL EAVRADRMRG GRNKFGPMYK RDRALKQQKK AQIRANGFKL

	LCLVEVRALS MQAKEYLYHK HLGNEMPRNN LLIEMLQAKQ T
Specificity:	Equus caballus (Horse)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.

Product Details > 90 % Purity: **Target Details** Target: NR5A1 Alternative Name Steroidogenic factor 1 (NR5A1) (NR5A1 Products) Background: Recommended name: Steroidogenic factor 1. Short name= SF-1. Short name= STF-1. Alternative name(s): Nuclear receptor subfamily 5 group A member 1 UniProt: Q9GKL2 Pathways: Nuclear Receptor Transcription Pathway, Steroid Hormone Mediated Signaling Pathway, Maintenance of Protein Location **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only Handling

Format: Lyophilized Concentration: 0.2-2 mg/mL Buffer: Tris-based buffer, 50 % glycerol Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to

one week

Handling

Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
