## Datasheet for ABIN1648680 MASP2 Protein (AA 20-685) (His tag)

Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | MASP2  |
| Protein Characteristics:      | AA 20-685                                    |
| Origin:                       | Rat  |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant                                  |
| Purification tag / Conjugate: | This MASP2 protein is labelled with His tag. |
| Application:                  | ELISA  |

| Characteristics:    | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien  |  |
|---------------------|---|--|
|                     | cells or by baculovirus infection. Be aware about differences in price and lead time.   |  |
| Purity:             | > 90 %  |  |
| Target Details      |   |  |
| Target:             | MASP2   |  |
| Alternative Name:   | Mannan-binding lectin serine protease 2 (Masp2) (MASP2 Products)  |  |
| Background:         | Recommended name: Mannan-binding lectin serine protease 2.<br>EC= 3.4.21.104.   |  |
|                     | Alternative name(s): MBL-associated serine protease 2 Mannose-binding protein-associated serine protease 2.   |  |
|                     | Short name= MASP-2 Cleaved into the following 2 chains: 1.  |  |
|                     | Mannan-binding lectin serine protease 2 A chain 2.  |  |
|                     | Mannan-binding lectin serine protease 2 B chain   |  |
| UniProt:            | Q9JJS8  |  |
| Pathways:           | Complement System   |  |
| Application Details |   |  |
| Comment:            | The yeast protein expression system is the most economical and efficient eukaryotic system  |  |
|                     | for secretion and intracellular expression. A protein expressed by the mammalian cell system is   |  |
|                     | of very high-quality and close to the natural protein. But the low expression level, the high cost  |  |
|                     | of medium and the culture conditions restrict the promotion of mammalian cell expression  |  |
|                     | systems. The yeast protein expression system serve as a eukaryotic system integrate the   |  |
|                     | advantages of the mammalian cell expression system. A protein expressed by yeast system   |  |
|                     | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the  |  |
|                     | native protein conformation. It can be used to produce protein material with high added value   |  |
|                     | that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. |  |
| Restrictions:       | For Research Use only   |  |
| -                   |   |  |
| Handling            |   |  |
| Format:             | Lyophilized   |  |
