Datasheet for ABIN1649222  
**SNRPB Protein (AA 1-240) (His tag)**

### Overview

Quantity:	1 mg
Target:	SNRPB
Protein Characteristics:	AA 1-240
Origin:	Opossum
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This SNRPB protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	MTVGKSSKML QHIDCRMRCI LQDGRIFIGT FKAFDKHMNL ILCDCDEFK IKPKNSKQAE REEKRVLGLV LLRGENLVSM TVEGPPPKDT GIARVPLAGA AGGPGIGRAA GRGVPAGVPM PQAPAGLAGP IRGVGGPSQQ VMTPQGRGTV AAAAAAATAS IAGAPTQYPS GRGGPPPMG RGAPPPGMMMA PPPGMRPPMG PPMGMPPGRG APMGMPPPGM RPPPPGMRGP PPPGMRPPRP
Specificity:	Monodelphis domestica (Gray short-tailed opossum)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

---

Target:	SNRPB
Alternative Name:	Small nuclear ribonucleoprotein-associated protein B (SNRPB) ( <a href="#">SNRPB Products</a> )
Background:	Recommended name: Small nuclear ribonucleoprotein-associated protein B'. Short name= snRNP-B'. Short name= snRPB'. Alternative name(s): Sm protein B'. Short name= Sm-B'. Short name= SmB'
UniProt:	<a href="#">Q9TU66</a>
Pathways:	<a href="#">Ribonucleoprotein Complex Subunit Organization</a>

## Application Details

---

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C

## Handling

---

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
