Datasheet for ABIN1649940 **IDI1 Protein (AA 1-182) (His tag)**

1 mg

Overview

Quantity:

Go to Product page

Target: IDI1 Protein Characteristics: AA 1-182 Origin: Brevibacterium Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This IDI1 protein is labelled with His tag. Application: ELISA Product Details

TNSFCGHPAP GETLEDAVSR RAEFELGLSI DHITCAIPNF SYVARDASGI EENEHCPVFI ARAVSSLTPN PAEVAEAQWT SSSELKSAID AAPWAFSPWL VEHFTELQPL IAEHIVEAED DD Specificity: Brevibacterium linens Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 %

Target Details

Sequence:

Target:	IDI1
Alternative Name:	Isopentenyl-diphosphate Delta-isomerase (idi) (IDI1 Products)

Target Details

Background:

Recommended name: Isopentenyl-diphosphate Delta-isomerase.

Short name= IPP isomerase.

EC= 5.3.3.2.

Alternative name(s): IPP:DMAPP isomerase Isopentenyl pyrophosphate isomerase

UniProt: Q9KK75

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
