## Datasheet for ABIN1650010 MSRB3 Protein (AA 27-176) (His tag)

| Overview                      |  |
|-------------------------------|--|
| Quantity:                     | 1 mg   |
| Target:                       | MSRB3  |
| Protein Characteristics:      | AA 27-176  |
| Origin:                       | Arabidopsis thaliana   |
| Source:                       | Yeast  |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This MSRB3 protein is labelled with His tag.   |
| Application:                  | ELISA  |
| Product Details               |  |
| Sequence:                     | DSIC LSSGVASTVA MAAPGSVQKG DEEWRAILSP EQFRILRQKG TEYPGTGEYV NFDKEGVYGC<br>VGCNAPLYKS TTKFNAGCGW PAFFEGIPGA ITRTTDPDGR RIEINCATCG GHLGHVFKGE<br>GFATPTDERH CVNSVSLKFT PAASSL            |
| Specificity:                  | Arabidopsis thaliana (Mouse-ear cress)   |
| Characteristics:              | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. |
| Purity:                       | > 90 %   |
| Target Details                |  |
| Target:                       | MSRB3  |
| Alternative Name:             | Peptide methionine sulfoxide reductase B3 (MSRB3) (MSRB3 Products)   |

| Target Details      |  |
|---------------------|--|
| Background:         | Recommended name: Peptide methionine sulfoxide reductase B3.                                       |
|                     | Short name= AtMSRB3.   |
|                     | EC = 1.8.4.12.   |
|                     | Alternative name(s): Peptide-methionine (R)-S-oxide reductase                                      |
| UniProt:            | Q9M0Z6   |
| Application Details |  |
| Comment:            | The yeast protein expression system is the most economical and efficient eukaryotic system         |
|                     | for secretion and intracellular expression. A protein expressed by the mammalian cell system is    |
|                     | of very high-quality and close to the natural protein. But the low expression level, the high cost |
|                     | of medium and the culture conditions restrict the promotion of mammalian cell expression           |
|                     | systems. The yeast protein expression system serve as a eukaryotic system integrate the            |
|                     | advantages of the mammalian cell expression system. A protein expressed by yeast system            |
|                     | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the     |
|                     | native protein conformation. It can be used to produce protein material with high added value      |
|                     | that is very close to the natural protein. Our proteins produced by yeast expression system has    |
|                     | been used as raw materials for downstream preparation of monoclonal antibodies.                    |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Concentration:      | 0.2-2 mg/mL  |
| Buffer:             | Tris-based buffer, 50 % glycerol   |
| Handling Advice:    | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to         |
|                     | one week   |
| Storage:            | -20 °C   |
| Storage Comment:    | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.                               |
