antibodies

Datasheet for ABIN1650074 TUBB2C Protein (AA 1-445) (His tag)

Overview

| Quantity: | 1 mg |
|-------------------------------|---|
| Target: | TUBB2C |
| Protein Characteristics: | AA 1-445 |
| Origin: | Nematode (Echinococcus) |
| Source: | Yeast |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This TUBB2C protein is labelled with His tag. |
| Application: | ELISA |

Product Details

| Specificity: | EYQQYQDATA EDEGEFDEDE EVEEA Echinococcus multilocularis |

Product Details

Purity:

> 90 %

Target Details

| Target: | TUBB2C |
|-------------------|--|
| Alternative Name: | Tubulin beta-2 chain (TUB-2) (TUBB2C Products) |
| Background: | Recommended name: Tubulin beta-2 chain. Alternative name(s): Beta-tubulin 2 |
| UniProt: | Q9NFZ6 |
| Pathways: | Microtubule Dynamics, M Phase |

Application Details

| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system |
|----------|--|
| | for secretion and intracellular expression. A protein expressed by the mammalian cell system is |
| | of very high-quality and close to the natural protein. But the low expression level, the high cost |
| | of medium and the culture conditions restrict the promotion of mammalian cell expression |
| | systems. The yeast protein expression system serve as a eukaryotic system integrate the |
| | advantages of the mammalian cell expression system. A protein expressed by yeast system |
| | could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the |
| | native protein conformation. It can be used to produce protein material with high added value |
| | that is very close to the natural protein. Our proteins produced by yeast expression system has |
| | been used as raw materials for downstream preparation of monoclonal antibodies. |
| | |

Restrictions:

For Research Use only

Handling

| Format: | Lyophilized |
|------------------|---|
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
