## NMT1 Protein (AA 1-434) (His tag)

Go to Product page

#### Overview

Quantity:	1 mg
Target:	NMT1
Protein Characteristics:	AA 1-434
Origin:	Arabidopsis thaliana
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This NMT1 protein is labelled with His tag.
Application:	ELISA

# **Product Details** > 90 % Purity: **Target Details** Target: NMT1 Glycylpeptide N-tetradecanoyltransferase 1 (NMT1) (NMT1 Products) Alternative Name Background: Recommended name: Glycylpeptide N-tetradecanoyltransferase 1. EC= 2.3.1.97. Alternative name(s): Myristoyl-CoA:protein N-myristoyltransferase 1. Short name= NMT 1. Short name= Type I N-myristoyltransferase 1 Peptide N-myristoyltransferase 1 UniProt: Q9LTR9 Pathways: Regulation of G-Protein Coupled Receptor Protein Signaling **Application Details** Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. Restrictions: For Research Use only

### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

## Handling

Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
