Characteristics:

> 90 %

Purity:

Quantity:	1 mg		
Target:	PCYT1B		
Protein Characteristics:	AA 1-369		
Origin:	Rat		
Source:	Yeast		
Protein Type:	Recombinant		
Purification tag / Conjugate:	This PCYT1B protein is labelled with His tag.		
Application:	ELISA		
Product Details			
Sequence:	MPVVTTDAES ETGIPKSLSN EPPSETMEEI EHTCPQPRLT LTAPAPFADE SSCQCQAPHE

Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien

cells or by baculovirus infection. Be aware about differences in price and lead time.

#### **Target Details**

Target:	PCYT1B		
Alternative Name:	Choline-phosphate cytidylyltransferase B (Pcyt1b) (PCYT1B Products)		
Background:	Recommended name: Choline-phosphate cytidylyltransferase B.		
	EC= 2.7.7.15.		
	Alternative name(s): CCT-beta CTP:phosphocholine cytidylyltransferase B.		
	Short name= CCT B.		
	Short name= CT B Phosphorylcholine transferase B		
UniProt:	Q9QZC4		

### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
