

Datasheet for ABIN1652086 HAT1 Protein (AA 1-467) (His tag)

	Go to Product page
Overview	
Quantity:	1 mg
Target:	HAT1
Protein Characteristics:	AA 1-467
Origin:	Arabidopsis thaliana
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This HAT1 protein is labelled with His tag.
Application:	ELISA

Target Details

Target:	HAT1
Alternative Name:	Histone acetyltransferase type B catalytic subunit (HAG2) (HAT1 Products)
Background:	Recommended name: Histone acetyltransferase type B catalytic subunit. Short name= HAT B. EC= 2.3.1.48
UniProt:	Q9FJT8

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
