Datasheet for ABIN1654956 LSM6 Protein (AA 1-80) (His tag)

Overview	
Quantity:	1 mg
Target:	LSM6
Protein Characteristics:	AA 1-80
Origin:	Ajellomyces capsulata
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This LSM6 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MENGSASEGK DPSAFLSEIT GAPVTVKLNS GVVYKGELQS VDGYMNIALE KTEEYVDGKL
	RRSYGDAFVR GNNVLYISAD
Specificity:	Ajellomyces capsulata (strain NAm1 / WU24) (Darlings disease fungus) (Histoplasma
	capsulatum)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	LSM6
Alternative Name:	U6 snRNA-associated Sm-like protein LSm6 (LSM6) (LSM6 Products)

Target Details	
Background:	Recommended name: U6 snRNA-associated Sm-like protein LSm6
UniProt:	A6R363
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
