## TBP Protein (AA 1-181) (His tag)

### Overview

Quantity:	1 mg
Target:	TBP
Protein Characteristics:	AA 1-181
Origin:	Methanococcus
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This TBP protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MEPEIKIVNV VVSTQIGTDI DLEYAADILD NAEYEPEQFP GLVCRLSDPK VALLIFRSGK
	LNCTGAKSKE DAEIAIKKII KELKEAGMEI IDNPVVSVQN MVATTELGME PNLDDISTLE
	CTEYEPEQFP GLVYRLSDPK VVVLIFGSGK VVITGLKVIE DAYIAFDKIS ATLKELEQEL
	Υ
Specificity:	Methanococcus vannielii (strain SB / ATCC 35089 / DSM 1224)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	TBP

#### **Target Details**

Alternative Name:	TATA-box-binding protein (tbp) (TBP Products)
Background:	Recommended name: TATA-box-binding protein.  Alternative name(s): Box A-binding protein.  Short name= BAP TATA sequence-binding protein.  Short name= TBP TATA-box factor
UniProt:	A6URP5
Pathways:	WNT Signaling

### **Application Details**

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

### Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
