Malate Dehydrogenase (MDH) (AA 1-309) protein (His tag)[Go to Product page](#)

Overview

Quantity:	1 mg
Target:	Malate Dehydrogenase (MDH)
Protein Characteristics:	AA 1-309
Origin:	Caldivirga maquilingensis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA

Product Details

Sequence:	MITIVGSGRV GATTA AFLMF YELDNEVT LI DVIKGLPQGE ALD LN HAAAI LGKSVRYKGS NDYKDMEGSD IVIVTAGLAR KPGMTREELA GKNAEISSI ADQIKKYAPN SIVIITTNPL DAMVYVLYKR LGFPRNRVIG FSGVLDSNRM AYYASQIIGI APESIIPVVL GQHGENMYPV PEASFVYGKP LTEFLTQEY NDIVKKT IQA GADITNLRGF SSNWGPAAGL ALMVDSIKKN RRRVFEASVY LDGEYGVKDV FAEVPVVLGK NGVEKIIELN LTPEQRQKFM QSIEAVKKNL TQVPPQYLK
Specificity:	Caldivirga maquilingensis (strain ATCC 700844 / DSMZ 13496 / JCM 10307 / IC-167)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	Malate Dehydrogenase (MDH)
Abstract:	MDH Products
Background:	Recommended name: Malate dehydrogenase. EC= 1.1.1.37
UniProt:	A8MAC1
Pathways:	Regulation of Lipid Metabolism by PPARalpha

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
