Datasheet for ABIN1655117

Alternative Name:

SRP19 Protein (AA 1-100) (His tag)

Overview Quantity: 1 mg SRP19 Target: Protein Characteristics: AA 1-100 Origin: Caldivirga maquilingensis Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: This SRP19 protein is labelled with His tag. Application: **ELISA Product Details** Sequence: MGKKDYWVVW RINIDSTVSR SNGRVVPROL AVDKPTLEEI AKAASMLGLK YEAHPEKKHP RHWFEEDYVG CIYVYKVDDY SRRSLIKKLA QIVKSSRRGG Specificity: Caldivirga maquilingensis (strain ATCC 700844 / DSMZ 13496 / JCM 10307 / IC-167) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % **Target Details** SRP19 Target:

Signal recognition particle 19 kDa protein (srp19) (SRP19 Products)

Target Details

Background:	Recommended name: Signal recognition particle 19 kDa protein. Short name= SRP19
UniProt:	A8MBC3
Pathways:	SARS-CoV-2 Protein Interactome

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
