## Datasheet for ABIN1656109 RNASE6 Protein (AA 24-150) (His tag)

Overview	
Quantity:	1 mg
Target:	RNASE6
Protein Characteristics:	AA 24-150
Origin:	Baboon
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This RNASE6 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	WPKHLTR AHWFEIQHIQ PSPLQCNRAM SGINNYTQHC KHQNTFLHDS FQNVAAVCDL
	LSIICKNRQH NCHQSSKPVN MTDCRLTSGK YPQCRYSTAA QYKFFIVACD PPQKSDPPYK
	LVPVHLDSIL
Specificity:	Papio hamadryas (Hamadryas baboon)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	RNASE6

Target Details	
Background:	Recommended name: Ribonuclease K6. Short name= RNase K6.
UniProt:	EC= 3.1.27 046527
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system

The yeast protein expression system is the most economical and efficient eukaryotic system
for secretion and intracellular expression. A protein expressed by the mammalian cell system is
of very high-quality and close to the natural protein. But the low expression level, the high cost
of medium and the culture conditions restrict the promotion of mammalian cell expression
systems. The yeast protein expression system serve as a eukaryotic system integrate the
advantages of the mammalian cell expression system. A protein expressed by yeast system
could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
native protein conformation. It can be used to produce protein material with high added value
that is very close to the natural protein. Our proteins produced by yeast expression system has
been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
