Datasheet for ABIN1656476 BFRB Protein (AA 1-157) (His tag)

Overview	
Quantity:	1 mg
Target:	BFRB
Protein Characteristics:	AA 1-157
Origin:	Neisseria Gonorrhoeae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This BFRB protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MKGDRLVIRE LNKNLGLLLV TINQYFLHAR ILKNWGFEEL GEHFFKQSIV EMKAADDLIE
	RILFLEGLPN LQELGKLLIG ESTEEIIACD LTKEQEKHEA LLAAIATAEA QQDYVSRDLL
	EKQKDTNEKH IDWLETQQEL IGKIGLPNYL QTAAQED
Specificity:	Neisseria gonorrhoeae
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
l'alget Details	
Target:	BFRB

Target Details	
Background:	Recommended name: Putative bacterioferritin B. Short name= BFR B
UniProt:	P77914
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions: Handling	For Research Use only
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
