antibodies

Datasheet for ABIN1656648 Hemoglobin, beta Adult Major Chain (HBB-B1) (AA 2-147) protein (His tag)

Overview

Quantity:	1 mg		
Target:	Hemoglobin, beta Adult Major Chain (HBB-B1)		
Protein Characteristics:	AA 2-147		
Origin:	Gadus morhua		
Source:	Yeast		
Protein Type:	Recombinant		
Purification tag / Conjugate:	His tag		
Application:	ELISA		
Product Details			
Sequence:	VEWTAAERR HVEAVWSKID IDVCGPLALQ RCLIVYPWTQ RYFGEFGDLS TDAAIVGNPK		
	VAAHGVVALT GLRTALDHMD EIKSTYAALS VLHSEKLHVD PDNFRLLCEC LTIVVAGKMG KKLSPEMQAA WQKYLCAVVS ALGRQYH		
Specificity:	Gadus morhua (Atlantic cod)		
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien		
	cells or by baculovirus infection. Be aware about differences in price and lead time.		
Purity:	> 90 %		
Target Details			
Target:	Hemoglobin, beta Adult Major Chain (HBB-B1)		
Alternative Name:	Hemoglobin subunit beta-1 (hbb1) (HBB-B1 Products)		
Order at www.antibo	Order at www.antibodies-online.com www.antikoerper-online.de www.anticorps-enligne.fr www.antibodies-online.cn

Target Details	
Background:	Recommended name: Hemoglobin subunit beta-1. Alternative name(s): Beta-1-globin Hemoglobin beta-1 chain
UniProt:	P84610
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions: Handling	For Research Use only
Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
