Datasheet for ABIN1656872
LIPG Protein (AA 303-688) (His tag)

Overview

| | |
|-------------------------------|---|
| Quantity: | 1 mg |
| Target: | LIPG |
| Protein Characteristics: | AA 303-688 |
| Origin: | Staphylococcus epidermidis |
| Source: | Yeast |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This LIPG protein is labelled with His tag. |
| Application: | ELISA |

Product Details

| | |
|------------------|--|
| Sequence: | KQKQYKNN DPIILVHGFN GFTDDINPSV LTHYWGGDKM NIRQDLEENG YEAYEASISA FGSNYDRAVE LYYYIKGGRV DYGAHAHAAKY GHERYGKTYE GVIYKDWKPGQ KIHVLVGHSMG GQTIRQLEEL LRHGNPEEVE YQKQHGGEIS PLYQGGHDNM VSSITTLGTP HNGTHASDLL GNEAIVRQLA YDVGKMYGNK DSRVDFGLEH WGLKQKPNES YIQYVKRVQN SKLWWSKDSG LHDLTRDGAT DLNRKTSNPN NIVYKTYTGE STHKTLAGKQ KADLNMFLPF TITGNLIGKA KEKEWRENDG LSVISSQHP FNQKYVEATD KNQKGVWQVT PTKHDWDHVD FVGQDSTDTK RTRDELQQFW HGLAEDLVQS EQLTSTNK |
| Specificity: | Staphylococcus epidermidis (strain ATCC 12228) |
| Characteristics: | Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time. |
| Purity: | > 90 % |

Target Details

| | |
|-------------------|--|
| Target: | LIPG |
| Alternative Name: | Lipase (lip) (LIPG Products) |
| Background: | Recommended name: Lipase. EC= 3.1.1.3. Alternative name(s): Glycerol ester hydrolase |
| UniProt: | P0C0R4 |

Application Details

| | |
|---------------|--|
| Comment: | The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies. |
| Restrictions: | For Research Use only |

Handling

| | |
|------------------|---|
| Format: | Lyophilized |
| Concentration: | 0.2-2 mg/mL |
| Buffer: | Tris-based buffer, 50 % glycerol |
| Handling Advice: | Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week |
| Storage: | -20 °C |
| Storage Comment: | Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C. |
