Datasheet for ABIN1657532  
**CRYM Protein (AA 1-313) (His tag)**

### Overview

Quantity:	1 mg
Target:	CRYM
Protein Characteristics:	AA 1-313
Origin:	Rat
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This CRYM protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	MRRAPAFLSA DEVQDHLRSS SLLIPPLEAA LANFSKGPDG GVMQPVRTVV PVAKHRGFLG VMPAYSAAED ALTTKLVTFY EGHSNNAVPS HQASVLLFDP SNGSLLAVMD GNVITAKRTA AVSAIATKFL KPPGSDVLCI LGAGVQAYSH YEIFTEQFSF KEVRMWNRTR ENAEKFASSV QGDVRCSSV QEAVTGADVI ITVTMATEPI LFGIEWVKPGA HINAVGASRP DWRELDDELM KQAVLYVDSR EAALKESGDV LLSGADIFAE LGEVVS GAKP AYCEKTTVFK SLGMAVEDLV AAKLVDYSWS SGK
Specificity:	Rattus norvegicus (Rat)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

---

Target:	CRYM
Alternative Name:	Thiomorpholine-carboxylate dehydrogenase (Crym) ( <a href="#">CRYM Products</a> )
Background:	Recommended name: Thiomorpholine-carboxylate dehydrogenase. EC= 1.5.1.25. Alternative name(s): CDK108 Mu-crystallin homolog NADP-regulated thyroid-hormone-binding protein ketimine reductase
UniProt:	<a href="#">Q9QYU4</a>
Pathways:	<a href="#">Hormone Transport, Sensory Perception of Sound</a>

## Application Details

---

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
