Datasheet for ABIN1659198

RAP1B Protein (AA 1-181) (His tag)

()	1/0	r\ /1	014	
()	ve	I V I	-v	V

0.10.1.011	
Quantity:	1 mg
Target:	RAP1B
Protein Characteristics:	AA 1-181
Origin:	Carp
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This RAP1B protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MREYKLVVLG SGGVGKSALT VQFVQGIFVE KYDPTIEDSY RKQVEVDGQQ CMLEILDTAG
	TEQFTAMRDL YMKNGQGFAL VYSITAQSTF NDLQDLREQI LRVKDTDDVP IILVGNKCDL
	EDERVVGKEQ GQNLARQWNS CAFLESSAKS KINVNEIFYD LVRQINRKTP VPGKARKKST C
Specificity:	Cyprinus carpio (Common carp)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	RAP1B
Alternative Name:	Ras-related protein Rap-1b (rap1b) (RAP1B Products)

Target Details

Background:	Recommended name: Ras-related protein Rap-1b	
UniProt:	Q9YH37	
Pathways:	CXCR4-mediated Signaling Events, Signaling of Hepatocyte Growth Factor Receptor	

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
