Datasheet for ABIN1659306

MOCS2 Protein (AA 1-91) (His tag)

Go to Product page

Overview

Quantity:	1 mg
Target:	MOCS2
Protein Characteristics:	AA 1-91
Origin:	Emericella nidulans
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This MOCS2 protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	MSTFQIHYFA SASTYTGRNT ESLPAPLPLS SLFDTLEAKY PGIKEKVLSS CSISLGDEYV DLVSDGEKSG NEGLLIQGGD EVAIIPPVSS G
Specificity:	Emericella nidulans (strain FGSC A4 / ATCC 38163 / CBS 112.46 / NRRL 194 / M139) (Aspergillus nidulans)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	MOCS2
Alternative Name:	Molybdopterin synthase sulfur carrier subunit (mocs2) (MOCS2 Products)

Target Details

Background:	Recommended name: Molybdopterin synthase sulfur carrier subunit. Alternative name(s): Common component for nitrate reductase and xanthine dehydrogenase protein G Molybdenum cofactor synthesis protein 2 small subunit Molybdenum cofactor synthesis protein 2A. Short name= MOCS2A Sulfur carrier protein MOCS2A
UniProt:	Q9Y8C2

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
