## Datasheet for ABIN1660027 Hemoglobin Subunit alpha-A (HBAA) (AA 2-142) protein (His tag)

Overview

Quantity:	1 mg
Target:	Hemoglobin Subunit alpha-A (HBAA)
Protein Characteristics:	AA 2-142
Origin:	Primate (Otolemur)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	His tag
Application:	ELISA
Product Details	
Sequence:	VLSPTDKSI VKAAWEKVGA HAGDYGAEAL ERMFLSFPTT KTYFPQFDLS HGSAQVKGHG KKVADALTNA VLHVDDMPSA LSALSDLHAH KLTVDPVNFK LLSHCLLVTL ACHLPAEFTP AVHASLDKFM ASVSTVLTSK YR
Specificity:	Otolemur crassicaudatus (Greater galago) (Galago crassicaudatus)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	Hemoglobin Subunit alpha-A (HBAA)
Abstract:	HBAA Products

International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/2 | Product datasheet for ABIN1660027 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

Target Details	
Target Type:	Viral Protein
Background:	Recommended name: Hemoglobin subunit alpha-A.
	Alternative name(s): Alpha-A-globin.
	Short name= Alpha-I Hemoglobin alpha-A chain
UniProt:	P14259
Application Details	
Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only
Handling	

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
