Datasheet for ABIN1660477
POLR2H Protein (AA 2-146) (His tag)

Overview

Quantity:	1 mg
Target:	POLR2H
Protein Characteristics:	AA 2-146
Origin:	Saccharomyces cerevisiae
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This POLR2H protein is labelled with His tag.
Application:	ELISA

Product Details

Sequence:	SNTLFDDIF QVSEVDPGRY NKVCRIEAS TTQDQCKLTL DINVELFPVA AQDSLTVTIA SSLNLEDTPA NDSSATRSWR PPQAGDRSLA DDYDYVMYGT AYKFEEVSKD LIAVVYSFGG LLMRLEGNYR NLNNLKQENA YLLIRR
Specificity:	Saccharomyces cerevisiae (strain ATCC 204508 / S288c) (Bakers yeast)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

Target Details

Target:	POLR2H
Alternative Name:	DNA-directed RNA polymerases I, II, and III subunit RPABC3 (RPB8) (POLR2H Products)

Target Details

Background: Recommended name: DNA-directed RNA polymerases I, II, and III subunit RPABC3.
Short name= RNA polymerases I, II, and III subunit ABC3.
Alternative name(s): ABC14.4 ABC14.5 DNA-directed RNA polymerases I, II, and III 14.5 kDa polypeptide

UniProt: [P20436](#)

Pathways: [Regulatory RNA Pathways](#)

Application Details

Comment: The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions: For Research Use only

Handling

Format: Lyophilized

Concentration: 0.2-2 mg/mL

Buffer: Tris-based buffer, 50 % glycerol

Handling Advice: Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week

Storage: -20 °C

Storage Comment: Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
