

Datasheet for ABIN1660495 Chemokine-Binding Protein (C23L) (AA 1-244) protein (His tag)

Overview

Quantity: 1 mg Target: Chemokine-Binding Protein (C23L) Protein Characteristics: AA 1-244 Origin: Vaccinia Virus (VACV) Source: Yeast Protein Type: Recombinant Purification tag / Conjugate: His tag Application: ELISA Product Details MHVPASLQQS SSSSSSCTEE ENKHHMGIDV IIKVTKQDQT PTNDKICQSV TEITESESDP DPEVESEDDS TSVEDVDPPT TYYSIIGGGL RMNFGFTKCP QIKSISESAD GNTVNARLSS VSPGQGKDSP AITREEALAM IKDCEVSIDI RCSEEEKDSD IKTHPVLGSN ISHKKVSYED IIGSTIVDTK CVKNLEFSVR IGDMCKESSE LEVKDGFKYV DGSASEGATD DTSLIDSTKL KACV Specificity: Vaccinia virus (strain Copenhagen) (VACV) Characteristics: Please inquire if you are interested in this recombinant protein expressed in E. coll, mammalia cells or by baculovirus infection. Be aware about differences in price and lead time. Purity: > 90 % Target Details

Target Details	
Alternative Name:	Inactive chemokine-binding protein (C23L) (C23L Products)
Target Type:	Viral Protein
Background:	Recommended name: Inactive chemokine-binding protein. Short name= vCKBP
UniProt:	P21090
Application Details	
Comment [.]	The yeast protein expression system is the most economical and efficient eukaryotic system

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
