Datasheet for ABIN1660692 Pro-MCH 1 Protein (MCH1) (AA 25-132) (His tag)

antibodies .-online.com

Overview

Overview	
Quantity:	1 mg
Target:	Pro-MCH 1 (MCH1)
Protein Characteristics:	AA 25-132
Origin:	Oncorhynchus keta
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Pro-MCH 1 protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	ISIGKM DDVALEQDTL DSLLSVEVSE NSPDSVRGRS SKIVLLADSG LWMNLNRGLP FYKLRAAAAG
	PDRALTLDRR EAGQDLSPSI SIVRRDTMRC MVGRVYRPCW EV
Specificity:	Oncorhynchus keta (Chum salmon)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	Pro-MCH 1 (MCH1)
Abstract:	MCH1 Products

Target Details	
Background:	Recommended name: Pro-MCH 1 Cleaved into the following 2 chains: 1.
	Neuropeptide-glutamic acid-valine.
	Alternative name(s): Neuropeptide E-V.
	Short name= NEV Melanin-concentrating hormone.
	Short name= MCH
UniProt:	P19713

Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system
	for secretion and intracellular expression. A protein expressed by the mammalian cell system is
	of very high-quality and close to the natural protein. But the low expression level, the high cost
	of medium and the culture conditions restrict the promotion of mammalian cell expression
	systems. The yeast protein expression system serve as a eukaryotic system integrate the
	advantages of the mammalian cell expression system. A protein expressed by yeast system
	could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the
	native protein conformation. It can be used to produce protein material with high added value
	that is very close to the natural protein. Our proteins produced by yeast expression system has
	been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
