Quantity:	1 mg
Target:	Core protein D3 (D3R) (D3R)
Protein Characteristics:	AA 1-237
Origin:	Vaccinia Virus (VACV)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Core protein D3 (D3R) protein is labelled with His tag.
Application:	ELISA
Product Details	
Sequence:	MDIFIVKDNK YPKVDNDDNE VFILLGNHND FIRLKLTKLK EHVFFSEYIV TPDTYGSLCV
	ELNGSSFQHG GRYIEVEEFI DAGRQVRWCS TSNHISEDIP EDIHTDKFVI YDIYTFDAFK
	NKRLVFVQVP PSLGDDSHLT NPLLSPYYRN SVARQMVNDM IFNQDSFLKY LLEHLIRSHY
	RVSKHITIVR YKDTEELNLT RICYNRDKFK AFVFAWFNGV SENEKVLDTY KKVSNLI
Specificity:	Vaccinia virus (strain Copenhagen) (VACV)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalien
	cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %
Target Details	
Target:	Core protein D3 (D3R) (D3R)

Target Details

Alternative Name:	Core protein D3 (D3R) (D3R Products)
Target Type:	Viral Protein
Background:	Recommended name: Core protein D3. Alternative name(s): 27 kDa virion core protein
UniProt:	P21009

Application Details

Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
