## mRNA-decapping protein D9 (D9R) Protein (AA 1-213) (His tag)

### Overview

Quantity:	1 mg
Target:	mRNA-decapping protein D9 (D9R) (D9R)
Protein Characteristics:	AA 1-213
Origin:	Vaccinia Virus (VACV)
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This mRNA-decapping protein D9 (D9R) protein is labelled with His tag.
Application:	ELISA

### Product Details

Sequence:	MGITMDEEVI FETPRELISI KRIKDIPRSK DTHVFAACIT SDGYPLIGAR RTSFAFQAIL SQQNSDSIFR VSTKLLRFMY YNELREIFRR LRKGSINNID PHFEELILLG GKLDKKESIK DCLRRELKEE SDERITVKEF GNVILKLTR DKLFNKVYIS YCMACFINQS LEDLSHTSIY NVEIRKIKSL NDCINDDKYE YLSIYNMLV NSK
Specificity:	Vaccinia virus (strain Copenhagen) (VACV)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

### Target Details

Target:	mRNA-decapping protein D9 (D9R) (D9R)
---------	---------------------------------------

## Target Details

---

Abstract:	<a href="#">D9R Products</a>
Target Type:	Viral Protein
Background:	Recommended name: mRNA-decapping protein D9. EC= 3.1.3.-
UniProt:	<a href="#">P21011</a>

## Application Details

---

Comment:	<p>The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modified such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.</p>
Restrictions:	For Research Use only

## Handling

---

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
