Target Details  Target: HBB2		cells or by baculovirus infection. Be aware about differences in price and lead time.
Target: HBB2	Purity:	> 90 %
	Target Details	
Alternative Name: Hemoglobin subunit beta-1/2 (HBB2 Products)	Target:	HBB2
	Alternative Name:	Hemoglobin subunit beta-1/2 (HBB2 Products)

#### **Target Details**

Background:	Recommended name: Hemoglobin subunit beta-1/2.	
	Alternative name(s): Beta-1/2-globin Hemoglobin beta-1/2 chain	
UniProt:	P45720

#### Comment:

The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modificated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.

#### Handling

Format:	Lyophilized	
Concentration:	0.2-2 mg/mL	
Buffer:	Tris-based buffer, 50 % glycerol	
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week	
Storage:	-20 °C	
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
