Datasheet for ABIN1662605

**Histone H1 Protein (AA 1-194) (His tag)**

## Overview

Quantity:	1 mg
Target:	Histone H1 (H1F0)
Protein Characteristics:	AA 1-194
Origin:	Xenopus laevis
Source:	Yeast
Protein Type:	Recombinant
Purification tag / Conjugate:	This Histone H1 protein is labelled with His tag.
Application:	ELISA

## Product Details

Sequence:	MTENSAPAAK PRRSKASKKS TDHPKYSDMI LDAVQAEKSR SGSSRQSIQK YIKNNYTVGE NADSIKLSI KRLVTSGLTK QTKGVGASGS FRLAKADEVK KPAKKPKKEI KKA VSPKKAA KPKKAAKSPA KAKKPKVAEK KVKKAPKKKP APSPRKAKKT KTVRAKPVWA SKAKKAKPSK PKAKASPKKS GRKK
Specificity:	Xenopus laevis (African clawed frog)
Characteristics:	Please inquire if you are interested in this recombinant protein expressed in E. coli, mammalian cells or by baculovirus infection. Be aware about differences in price and lead time.
Purity:	> 90 %

## Target Details

Target:	Histone H1 (H1F0)
---------	-------------------

## Target Details

Alternative Name:	Histone H1.0-A (h1f0-a) ( <a href="#">H1F0 Products</a> )
Background:	Recommended name: Histone H1.0-A. Alternative name(s): H1-SB H1E Histone H1(0)-1 Histone H5B XIH5B
UniProt:	<a href="#">P22845</a>

## Application Details

Comment:	The yeast protein expression system is the most economical and efficient eukaryotic system for secretion and intracellular expression. A protein expressed by the mammalian cell system is of very high-quality and close to the natural protein. But the low expression level, the high cost of medium and the culture conditions restrict the promotion of mammalian cell expression systems. The yeast protein expression system serve as a eukaryotic system integrate the advantages of the mammalian cell expression system. A protein expressed by yeast system could be modiflicated such as glycosylation, acylation, phosphorylation and so on to ensure the native protein conformation. It can be used to produce protein material with high added value that is very close to the natural protein. Our proteins produced by yeast expression system has been used as raw materials for downstream preparation of monoclonal antibodies.
Restrictions:	For Research Use only

## Handling

Format:	Lyophilized
Concentration:	0.2-2 mg/mL
Buffer:	Tris-based buffer, 50 % glycerol
Handling Advice:	Repeated freezing and thawing is not recommended. Store working aliquots at 4 °C for up to one week
Storage:	-20 °C
Storage Comment:	Store at -20 °C, for extended storage, conserve at -20 °C or -80 °C.
